

Amendments to the Specification:

Please replace the paragraph beginning on page 5, line 3, with the following rewritten paragraph:

FIG. 7a shows how a wire frame can be used to enhance the rigidity of the folded donor sheet edges;

Please replace the paragraph beginning on page 5, line 5, with the following rewritten paragraph:

FIG. ~~7a~~ 7b shows in detail a folded edge of FIG. 7a; and

Please replace the paragraph beginning on page 6, line 26, with the following rewritten paragraph:

Turning now to FIGS. 7a and ~~7a~~ 7b where, when wire frame 6 is used, the notched edge portions of the donor sheet 1 are folded about the rigid wire frame 6. The folded edge portions are then secured to the main body of the donor sheet 1. In this arrangement, the folded edge portion in conjunction with the wire frame 6 forms four rigid edges so as to provide a rigid edge frame which can be readily mounted in an OLED device manufacturing process.
